Intending to major in Information Science with a minor in Spanish Language and Culture.

Eleanor Roosevelt High School Science and Technology Program

May 2019

Eleanor Roosevelt High School, Greenbelt, MD

Highly selective Science and Technology Program, identified as one of the top high schools in the area by *Forbes* and *Washingtonian* magazines. Honor roll student for all four years, graduated with a 3.8 GPA. Selected for the National Honor Society, Tri-M Music Honor Society and Spanish Honor Society. Four-year student athlete on JV and Varsity Girls basketball teams, achieving a 24 - 3 record, and winning the Maryland State Championship in 2018. Actively involved in community service both inside and outside of the school.

EXPERIENCE

Stanford University Silicon Valley Innovation Academy Student

June 2020 - August 2020

Admitted to Stanford University for its Summer Session and will be taking classes. Admitted to Silicon Valley Innovation Academy (SVIA), which is offered to a limited number of Summer Session students. Throughout the eight week program, SVIA students will gain experience working in Silicon Valley with weekly hands-on activities, networking sessions, projects, and the program ends by presenting ideas to the “broader Silicon Valley public and the Stanford community.”

LEADERSHIP ROLES

Media Team Manager Student Government Communication

September 2019 - present

Part of the media team that produces and edits videos for the University of Maryland SGA social media.

Teaching Assistant, Girls Who Code, at the University of Maryland

September 2019 - November 2019

Support professors helping middle school girls learn Javascript, while also learning about coding and computer science.

EXTRACURRICULAR ACTIVITIES

Terps for Change, University of Maryland

February 2020- present

Weekly volunteer for Little Lights, a non-profit organization with the goal to empower underserved youth and their families that live in one of two public housing communities on Capitol Hill in Washington DC. Weekly participant in Terps for Change dialogue discussing what we learn from giving back to the community.

Girls Who Code Seven Week Immersion

June-July 2018

Created weekly projects using Scratch, HTML, Java, Javascript, and Python; gave presentations to Congresswomen to emphasize the importance of women and minorities in computer science; participated in a hackathon with Qualcomm software engineers.

John Hopkins Perry Initiative

Summer 2018

Completed multiple variations of simulated orthopedic procedures; worked with orthopedic surgeons, surgical residents, and medical students; learned about the importance of women in orthopedic surgery.
